

# Middle Tennessee Career Discovery

## WELCOME

Founded in 2019, our purpose is to help students in our community explore passions, interests, and career aspirations before committing their time and their family's resources to higher education. We feel that providing a platform for a student to "try on for size" his or her major or field of interest, as soon as possible, will result in better outcomes for students and families.

## MISSION

A local non-profit helping students discover and explore careers with the support of area businesses, professionals, and mentors.

## DISCOVER. EXPLORE. SUCCEED.

Through extensive community networking, our goal is to be able to connect a student to a prospective type of business, industry or a professional working in the field. This program is open to students who are planning to go to a four-year college, community college, trade school, or have no clue!

We hope to provide a resource that students and families will find useful. Useful in helping evaluate options after high school and beyond!
